

INTRODUCTION

Hi, I'm James. I'm an independent animator from the United Kingdom. I have experience in both professional studio environments in France, and producing my own successful animated content online. I'm well versed in the process of working closely with clients to form a deep mutual understanding of a project and bringing new ideas to the table. I have over 10+ years of experience with Adobe Flash and much experience with the Adobe Suite in general. I am very confident in my workflow, extremely hard working and passionate about animation.
